<u>Y5 – Autumn – Block 3 – Step 3 – Factors Answers</u>

<u>Y5 – Autumn – Block 3 – Step 3 – Factors Answers (continued)</u>

Question	Answer
10	sometimes true If a number is a square number, then it will have an odd number of factors because one factor pair is the same number twice e.g. 16 has five factors, 1, 2, 4, 8, 16
