

## One Step on the Moon

One step on the moon  
was a giant leap for mankind.  
One step on the moon  
and what did the astronauts find?

They found rocks and craters and moon dust,  
but they didn't find a sign of life.  
They didn't get to meet the man in the moon,  
they didn't even meet his wife!

They left their footprints behind on the moon,  
with the flag of the U.S.A.  
Then signalled back to earth with the news,  
saying, "what a fabulous day, oh what a fabulous day!"

They found rocks and craters and moon dust,  
but they didn't find a sign of life.  
They didn't get to meet the man in the moon,  
they didn't even meet his wife!

They left their footprints behind on the moon,  
with the flag of the U.S.A.  
Then signalled back to earth with the news,  
saying, "what a fabulous day, oh what a fabulous day!"
